Summary

Software Engineer with a proficiency in object-oriented programming languages, cloud computing platforms, and modern web application frameworks. 2+ years of experience developing highly functional, scalable software solutions, lifecycle management, and collaborating with cross-functional teams to create visually appealing, high-quality platforms.

Work Experience

Software Engineer, bioAffinity Technologies, Remote

Jan 2024 — Present

- Helping to improve internet presence and platform functionality with the use of modern technologies such as HTML, CSS, React, and JavaScript.
- Leading the development and implementation of all software solutions, collaborating with cross-organizational teams to ensure high-quality products, and communicating progress of projects and release details with stakeholders.
- Increased mobile traffic and mobile page views by 25% by optimizing Mobile SEO, implementing responsive designs, and improving user experiences.
- Fostering an environment of continuous improvement and functionality. Utilizing tools such as Google Analytics and Google Data Studio to gather deeper insights into use behavior, website performance, and marketing effectiveness.

Software Engineer, Divercity Inc, Remote

Sep 2022 — Nov 2023

- Collaborated with cross-functional teams in agile ceremonies to define and write actionable user stories, identify project scopes, project timelines, and discuss long and short-term initiatives.
- Implemented the 12-factor methodology and ensured adherence to quality and change control standards throughout the software development lifecycle.
- Wrote and refactored code with maintainability and optimization in mind, yielding a 20% enhancement in website performance.
- Utilized modern web technologies such as React.js, Node.js, AngularJS, and best practices for UX/UI to achieve a 15% reduction in page load speeds and conversion rates of front end web applications.
- Developed and implemented RESTful APIs and utilized SQL queries against relational databases.
- Participated in code reviews and pair programming with peers and senior engineers.

Skills

- HTML/CSS, JavaScript, React.js, Node.js, Git, GitHub, RESTful APIs, SQL, MySQL, CI/CD toolchains, Jira, Slack, Figma, Storybook, Bitbucket
- Effective Communication, Fast Learner, Positive Attitude, Ability to Give and Receive Constructive Feedback, Problem Solving, Creativity, Passionate, Self-Development, Situational Adaptability

Education

Software Engineering, UC Berkely Extension

Jun 2024

- Part-time courses at night which allow me to continuously strengthen my subject matter expertise while continuing to work full-time.

Software Engineering, Coursera

Aug 2023

Software Engineering, Treehouse ([teamtreehouse.com](https://www.teamtreehouse.com))

Sep 2022

Bachelor's Degree, University of New Mexico

May 2020
